Stakeholder Comment Period	April 2020	
Finalize draft rule	May 2020	
State Board of Health Briefing	June 2020	
Draft significant analyses	August 2020	
File CR-102	October 2020	
Public Hearing	November 2020	
Prepare Concise Explanatory Statement	December 2020	
File CR-103	December 2020	
Rule Effective	January 2021	

Purpose

On November 18, 2019, the State Board of Health directed staff to file a CR-101, Preproposal Statement of Inquiry to consider making changes to the rule chapter. The purpose is to align requirements with the anticipated changes to chapter 246-290 WAC, Group A public water supplies related to Per- and Polyfluoroalkyl substances. Key provisions may include a new PFAS template for data analysis reporting, notification of PFAS detections to the Department of Health and public water systems, adding state detection reporting limits for PFAS and making technical corrections as needed.

Recent Issues and Activities

We anticipate the CR-101 will be filed in mid-February 2020.

Next Steps

Staff will begin drafting rule language and share the draft rule with stakeholders to obtain feedback.
